SUMMARY

Computer Engineering graduate with hands-on Python, C#, and C++ experience, a completed internship, and research projects in sensor-based measurement and machine learning. Detail-oriented and self-driven, seeking an entry-level data management role where accuracy, documentation, and quality checks matter.

EXPERIENCE

Intern (Mobile App and Product Data), Hytec Power Inc.

May 2025 – July 2025

- Designed the UI in Figma and built the frontend of the company's mobile app in React Native, covering the company profile, services, a marketplace-style product catalog, and partner companies.
- Met regularly with the company president and employees to gather requirements and shape the app's features; worked alongside interns from another school.
- Verified approximately 120–150 product listings on the company website against a company-provided database, checking each product's description, ID, company, and country of origin for accuracy.

PROJECTS

AgroLens: Offline Mobile Pest Detection System (Research)

- Built an Android app that identifies rice and corn pests offline, using a MobileNetV2 image classifier trained on 3,692 images across 11 pest categories.
- Evaluated the model on 473 test samples: 84.57% accuracy and 85.64% macro F1-score, rising to 86.84% accuracy at a 70% confidence threshold.

H2O Potability: Portable Water Quality Checker (Research)

- Built a portable device that measures pH and turbidity of household water and sends SMS notifications; tested on 40 water samples with 95.4% accuracy.

Club Management System

- Developed in C# with one partner an object-oriented program that collects and manages club member information and records.

Automatic Trash Bin and Traffic Light (Logic Gates)

- Built a sensor-driven automatic trash bin and designed a working traffic light circuit using logic gates.

EDUCATION

Bachelor of Science in Computer Engineering

2022 – 2026

University of Saint Louis, Tuguegarao

2nd and 3rd Year Dean's Lister

SKILLS

Programming: Python, C#, C++, Kotlin, Arduino

Tools: Microsoft Excel, React Native, Figma, Visual Studio, Android Studio, PyCharm

Soft Skills: Attention to Detail, Communication, Collaboration, Critical Thinking, Strong Work Ethic

CERTIFICATIONS

Computer Systems Servicing (CSS) | Civil Service Eligible, Professional Level (CSE-PPT)

AWARDS & ACTIVITIES

- Quiz Bowl Participant, ICPEP Region 2 Convention CpE Challenge, 2024 and 2025
- Attended seminars on robotic process automation (April 2026), AI and sustainability, and Industry 5.0 (February 2026)
